

# Project Information Sheet

## E 19<sup>th</sup> Avenue Paving Project

### Project Overview:

- 19<sup>th</sup> Avenue has been reconstructed from east of Hilyard Street to west of Alder Street.
- A temporary diversion will be installed at the intersection of Alder Street and E 19<sup>th</sup> Avenue. The diversion will include installing a modular median island and converting the intersection to a 4-way stop. Motorists on Alder Street northbound and southbound will be required turn right at the intersection while Bicyclists will be allowed to continue straight onto Alder Street. The intention of the diversion is to make the intersection more bicycle friendly.
- Curb extensions have been constructed at all the intersections except Alder Street and Harris Street to help increase pedestrian safety.
- Filtration stormwater planters have been constructed at several locations to treat stormwater runoff. Soil will be installed in the coming weeks and they should be planted Spring 2020.
- Work also included reconstructing sidewalk access ramps throughout the project in order to comply with the Americans with Disabilities Act.
- This project was primarily intended to repair the street pavement but additional repairs to stormwater infrastructure, curbs, driveways, and sidewalks was also completed.

### Construction Schedule:

- A majority of the work has been completed. Due to weather and cold temperatures the project will be winterized in the coming weeks and the final lift of asphalt pavement will be constructed when we have warm dry weather.
- Eugene Sand Construction is the contractor.

### Traffic Impacts:

- Drivers should expect lane and road closures and lane shifts during construction.
- Bicyclists should expect to merge with motor vehicle traffic depending on available lane widths during construction.
- With any construction, drivers should expect equipment and workers in the roadway leading to congestion and delays during the work.
- Availability of on-street parking may be reduced or closed during construction.

### Project Funding:

- The major source of funding is the voter approved 2017 Bond Measure to Fix Streets.
